Wrap-up

# IDS AirNav AeroSIG 2020

## More Info:

### Showroom details

The new virtual showroom has just been introduced in order to help new and old customers to have a quick glance at all the products and services IDS AirNav is offering; its structure is based on the former showroom we had in our offices in Rome where, on the left side you will find all products of the AIM suite, in the middle the ATM ones and on the right side the design and validation products.

To visit the showroom simply follow the link :

<https://www.idsairnav.com/main-areas/virtual-showroom/>.

Each single workstation can be remotely accessed to visualize the product brochure, the video or the dedicated page with its technical details.

Moreover, you will have the possibility to request a virtual meeting describing your needs.

### Disclaimer

We would like to remind you that all the documentation shown during AeroSIG 2020 sessions are owned by IDS AirNav and shall not be transferred to anyone, unless a previous written agreement is settled with IDS AirNav.

### Additional notes

During all AeroSIG 2020 sessions we will remind all attendees to keep the microphone and camera switched off and, in case of questions, to raise your virtual hand and wait for the presenter to give you the floor.
